ABOUT US

Incorporated in 1999, blast resistant since 1991. Our technologies have been used worldwide to harden structures and vehicles against bombs and bullets. From the White House to Korea, our products and services can be found saving lives and providing safety, comfort, and peace of mind. We are a **HUBZone Certified Small Business Concern**.

MISSION

- To develop and deploy lifesaving technologies that are best in class and save the most lives for the least money!
- To manufacture made in America products and support jobs in Maryland and Pennsylvania.
- To support our troops and always look to the talented pool of vets as we expand.

CORE COMPETENCIES

Safetydrape® is a patented (U.S. Patent No. 5,915,449) bomb blast curtain designed to mitigate glass shards propelled by an explosion. Safetydrape® has been subjected to extensive testing using various types of explosives. This venting will allow Safetydrape® to effectively mitigate glass shards through a wide range of blast pressures without having to reinforce or restructure the existing window frames, anchorage or building.

Testing Safetydrape® has been designated and certified as a QATT (Qualified Anti-Terrorism Technology) by the DHS. Safetydrape® MEETS & EXCEEDS many other testing criteria. Please visit our website for more data.

With extensive manufacturing experience in aramid fibers, ballistic fiberglass, and armor plate, we have the tooling and design skills to help you save the most lives against ballistic threats for the least cost. With simple yet effective design, we keep the cost down so more products can be deployed covering more real-estate for less expense.

Quickly create a safe zone and defensive position with our Ballistic Rolling Panels to mitigate the event of an active shooter. These systems can quickly be assembled into a circle for 360-degree coverage active shooter protection.

MitiTech LLC has developed countless one-off solutions for military and industrial use, from ballistic panels and wall systems to groin protectors. Mitigation Technologies has been a trusted source for innovative ideas and requested by the Pentagon to DuPont for ideas and prototypes. Our Ballistic panels are designed to meet a multitude of requirements, including; tack boards, transparent, or can be down and dirty cheap when aesthetics are the least of the concern. Manufactured to any NIJ or UL standard and above!

TAP Barrier® System is a Temporary Anti-Personnel Barrier developed in response to a desire at the Department of State to add a layer of security to US embassies worldwide.
